01 PROFILE

Senior **PHP / Laravel engineer** with **8+ years** of architecting and shipping production-grade web platforms across e-commerce, fintech, parking, real estate and government sectors. Known for writing clean, scalable, well-documented code and setting high engineering standards across teams through rigorous code reviews and Agile practices.

A hands-on technical leader who takes ownership of the full software lifecycle, from database design and API architecture to Linux server deployment and performance optimization. Focused on query-level and code-level efficiency to deliver fast, reliable applications while collaborating with cross-functional teams to turn business requirements into scalable technical solutions.

Building AI solutions with OpenAI & Claude APIs, including search, summarization, and chatbots.

Author of **Larite**, an **open-source PHP MVC framework**, plus multiple Laravel packages sold on code marketplaces.
